

ATL Composites supplies alternative, blended fillers to those listed by Gougeon Brothers in this manual. As blended fillers they have an added degree of thixotropy and substantially improved spreading and working properties.

Use the charts and recommendations in this manual, substituting the ATL Fillers for the ones listed.

Gougeon Filler	ATL Filler	Comments
403 Microfibres	413 Microfibre Blend	for structural bonding
404 High Density	413 Microfibre Blend	for structural bonding
405 Filleting	411 Microsphere Blend	for filleting and edge gluing in strip planking applications
406 Colloidal Silica	413 Microfibre Blend	for structural bonding
407 Low Density Filler	417 Microballoons	for fairing under dark coloured paints
410 Microlight	410 Microlight	for fairing under light coloured paints
